Lentz So Introduced W. J. Bryan.

BANQUET MELD IN COLUMBUS.

Colebration of Lincoln's Birthday, by the Jefferson, Jackson and Lincoln League, at Columbus.

Columbus, O., Feb. 13.—The ninetysecond anniversary of the birth of Apraham Lincoln was celebrated here last night by the Jefferson, Jackson and Lincoln league with a collar dinner at the Columbus auditorium. There were fully 1,500 people seated at tables, which occupied the floor of the immense hall, and 1,000 more seated in the galleries. which had been thrown open to spectators. Many ladies were noticed among those at the tables. The bill of fare was not elaborate. There were no cigars and no beverages stronger than coffee.

The feature of the evening was the demonstration in honor of William J. Bryan. He was received with loud applause when he entered the hall but the crowd fairly went wild when Mr. Bryan was introduced to speak. Men climbed upon chairs and cheered again and again, and it was some minutes before the demonstration subsided. Congressman John J. Lentz, the toastmaster, introduced Mr. Bryan.

"The last time," said Mr. Lentz. 'I had the pleasure of introducing Mr. Bryan to you I introduced him as the next president of the United States. I again introduce him to you as I did then."

In the course of his speech Mr. Bryan said:

"Never has this nation been more principles. While other statesmen, appearing at different crisis and meet-Timothy Seed...... 2 00 ing the responsibilities of their re spective times, have made partial application of Democratic principles, Jefferson is the only one who formulated a democratic code applicable to all times, all situations and all peo-

"Though a champion of the common people, he was born among the aristocrats and was as intimately acquainted with the members of the Cabbage, per dozen 40-50 house of have as was those who struggled to meet by daily work then daily wants.

"He was colled a diam's gree by his one mes, and yet he esh uted a l moral comaço al tractors has ever ressered, and in be half of a righteons principle he won't oppose the sorbl.

"Two years before he write the Decharation of Indendednee he prepared a summar, view of the rights of British America which was a bola repudiation of the authorny which England claimed. That was not the work of a demagogue,

"He attacked the laws of primogenifure and entail, and saved America. from a landed aristocracy. That was not the work of a demagogne.

"He condemned slavery when the ystem was popular in his state and in the nation, and he did it threequerters of a century before emancipation crewned Lincoln with martyrdom and immortality. That was not the work of a demagogue.

"He organized the Democratic party and by the strength of his leadership overthrew an opposition in trenched in power and bulwark by

the business and social forces, "So successful was his administration that his re-election was practically unanimous, and for years the executive chair was filled by menunto whom he had been a Gamaliel

"At this time, when the money changers are in absolute control of the government, and are shaping the nation's financial policy in their own interests, without regard for the welfare of the people at large, we need to recall Jefferson's scathing arraignment of those who demand the surrender into their hands of the sovereign functions of government

"He pointed out that the safety of the people lay in a policy that would live groom. driv the banks out of the governing business.

"At this fime, when corporate monopoly is fast extinguishing indus trial independence, we need a revival of the Jeffer-onian spirit which do mands a government administered according to the doctrine of equal rights to all and special privileges to

"Our Duty." Congressman David A. Dearmond, of Missouri,

"Democratic Principles-Past, Pres ent and Future," Alexander Treep, of Connecticut.

"Jackson," former Governor John P. Altgeld, of Illinois. "Lincoln," former Senator Charles A. Towne, of Minnesota.

Tuesday afternoon a conference was held in the assembly room, at the Chittenden, to consider that propsitn to enlarge the scope of the Jefferson, Jackson and Lincoln league, which has up to this time been a purely local organization. About 300 Democrats, the greater proportion of whom were from Ohio, were in attendance. There were representatives also from Penusylvania, West Virginia, Indiana, Illinois, Michigar, Minnesota and Massachusetts. Congressman Lentz acted as chiarman of the conference. He said it had been suggested that the league he reor ganized along state or national lines. and invited the views of those pres-

Willis J. Abbott, of Ann Arbor. Mich., suggested that a committee of five be appointed on constitution to amend that instrument so that it would apply to a state and national organization, and a motion to that effect was adopted.

A. J. Elias, of Buffalo, invited the league at its next conference to meet in Buffalo on the occasion of the Paa-American exposition. The league accepted the invitation, the date for the meeting to be determined by the executive committee.

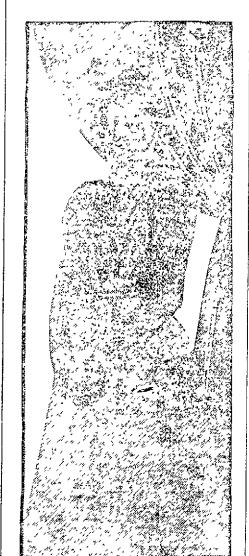

Chairman Lentz suggested that a committee on ways and means ought to be appointed to have charge of the Buffalo meeting. After a long discussion a resolution for the appointment of a committee representing each state in the organization was adopted It is understood that Norman E. Mack, of Buffalo, will be chairman and have charge of the meeting at Buffalo.

The conference then adjourned.

May Be Head of the Projected Steel Combine.

DID MORGAN SUGGEST FRICK!

Said to Have Done So, but Was Net Disposed to Press the Point, In Face . Strong Demands For Schwab-Carnegie Rumored For Schwab.

New York, Feb. 13.--After a long conference between President Charles M. Schwab and Vice President Phipps, of the Carnegie Steel company, Henry C. Frick and representatives of J. P. Morgan, it was stated authoritatively last night that the big steel consolidation was nearer consummation than ever before. The report from l'littsburg that a hiter had occurred over the question of a head of the new combine was positively denied. Wall street belives that Charles M. Schwab will be president of the consolidated companies and this was confirmed last night by a manufacturer, who has been in touch with the Carnegie principals Mr. Morgan is said to have suggested Mr. Frick, owing to his close personal relations with that gentleman, but is not disposed to press the point in the face of strong demands for Mr. Schwab. Andrew Carnegie has insisted all along that Mr. Schwab should be here.

"Mr. Frick's position is not clear." said the authority quoted above. "If he were disposed to stand out for the presidency with Mr. Morgan's backing it would be Mr. Frick or no cousolidation. I do not think, however, the issue will be carried this far. It certainly has not been as yet. From the present situation I believe Mc Schwab will undoubtedly be chosen."

## MRS. NATION IN CHICAGO. Delivered a Lecture There; Also Spoke

at Some Towns En Route From Rear Lnd of Car.

Chicago, Feb. 13.-Wrs. Carrie Nation arrived in Chicago last night, coming over the Rock Island road, Later she faced an audience gathered Under the ad-pices of local members Intimate Friend of Lincoln-Two Tern of the W. C. T. U., in Willard hall On her trip toward Chicago she debyered a number of short addresses from the rear end of the car, speaking at nearly every station where a sten was mode.

Coly a very small crowd was at the depot and it was for the most tree so the source of the Line Section will be celebrated

## UMBERS TO MILITIA

Prevent the Nulsance, at Cincinnati.

Cincinnati, Feb. 13.-If Judge Hollister issues an injunction against the prizefight nuisance the attorneys for 197 PRESBYTERIES HEARD FROM. the promoters say that they will then appeal the case to a higher court and thence to the supreme court. In that event there is no doubt about the di rectors of the Saengerfest Athletic association meeting on Thursday after noon with Managers Brady, Madden and others and postponing the date for the contest for two or three weeks. so as to give time for the case to be carried to the court of last resort.

Meantime there was much comment over the active preparations of Gov ernor Nash in having two or three regiments of militia awaiting orders to proceed to Cincinnati.

## NO TYPHOID FEVER,

Not a Case on Guam During Autumn. Provisions to Needy-Houses Were Being Reharlt.

Washington, Feb. 13.-A report in the shape of a letter, dated Dec. 17. 1900, from the governor of Guam to the navy department contained the following.

"The island of Guam is doing as well as can be expected. A consid erable number of the timber and nipa houses have been rebuilt, and the greater part of the population is now under cover, with a fair degree of comfort. The reconstruction of the masonry houses is progressing and tile and iron roofs are being repaired and replaced. There have been is sued so for to the needy about 4,600 tons of previsions, all of which have been provided by the island treasury. The immediate recessity of rebuilding houses has diverted for the present a large amount of labor which could otherwise have been employed in the fields and ranches.

"It is pleasant to chronicle that there has not been a case of typhon on the island this autumn,"

Committee to Consider Again

Convened.

Harrison and Noyes, of the Committee, Were Not Present-Some Definite Decision May Be Reached During the Sessions In Washington.

Washington, Feb. 13.-The commit-

tee of prominent members of the Presbyterma church, appointed to consider the duestion of a revision of the creed, for report to the next General Assembly, to meet in May, resumed its sessions here last night, after an adjournment of some weeks. All the members were in attendance except ex-President Harrison, who was detained on business, and Judge Daniel R. Noyes, who is on his way to Europe. At the close of the last meeting of the committee a statement was issued to the general effect that the returns from the presbyteries plainly indicated that the church desired some changes in its credal statement. but the matter was left in abeyance for further consideration and discussion. It is expected that some definite action in the direction of a revision of the confession or a supplemental statement will be agreed on

at this meeting. At last night's meeting only preliminary business was transacted. Reports from seven additional presbyteries containing their views on the questions propounded were submitted, but their nature was not disclosed. The committee now has heard from 197 presbyteries in all.

NEXT NATIONAL C. E. MEETING.

John Willis Baer Reached Cincinnati to Conter With Local Committee.

Cincinnati, Teb. 13.—John Willis Bacr, general secretary of the United Society of Christian Endeavor, arrived here from Boston to confer with the local committee rgarding the arrangements for their international convention in this city July 6 to 10. Secretary Paer was much pleased with the arrangements, and says that his correspondence already indicates a much a rger attendance than ever before. Lie announces that it has been decided to hold the international conveatous hereafter buennfally mstead of ambuaby, so that there will be no other great gathering until 1903. The tweatieth anniversary or that composed or members of the research of th is en to Costa Reca, a mem already prepared a very elaborate the Wr sing supreme const program, w1771 included Rev. G. Campbell Morgan, of Lordon, who har I son invited to take up the late D. L. Mordy's work in this country. The program includes other distinguished speakers from Europe, as well as the leading clergy and lecturers of this country and Canada. See return it er is gratified to learn that the local committee secured the promise of Governor Nash to open the conversion, and he sid that Governor Nash would no doubt receive the most entinesustic ovation ever ac corded anyone on account of his stand against prizatighting. Secretary Back addressed a large mass meeting tax

# **COURT OF ARRITRATION**

August Body Ready to Consider International Disputes.

WORLD'S HIGHEST TRIBUNAL.

List of Members of The Hague Tribunnl Issued by the State Department-Members Have Been Appointed by Pifteen Nations, Embracing All the Maritime Powers.

The permanent court of arbitration provided for by the convention signed at The Hague on July 29, 1899, is now ready to consider any international dispute that may be presented. Easily the highest tribunal in the world, with the most numerous and eminent bench of any court ever projected, this single fruition of the czar's peace conference has just been completely organized for

business, and the state department officially issued the other day the very interesting roster of its membership. including its secretaries, writes the Washington correspondent of the New York Tribune. Fifteen nations, embracing all the maritime powers, have appointed their members, and only a 1ew countries comparatively insignificant as international factors are unrepresented. These are Bulgaria, Montenegro, Persia, Siam and Switzerland. The official roster is as follows:

AUSTRIA-HUNGARY.

His excellency Count Frederic Schonborn, LL. D., president of the imperial royal court of administrative justice, former Austrian minister of justice, member of the house of lords of the Austrian parliament, etc. His excellency Mr. D. de Szilagyi, ex-minister

GREAT DISCOVERYIN DAKOTA

Earth Which Is Found In but Few Places In America,

A new material will soon be placed among the rare things mined from the Black Hills. Fuller's earth is a valuable material, found in but few places in America. The finest quality is found in England, which is practically the world's supply. Recently a large deposit of this material has been found in the Black Hills and it most closely resembles that found in England of any deposit in America, says the Boston Transcript.

The fuller's earth of the Black Hills contains from 60 to 75 per cent silica, with from 15 to 25 per cent water after being sun dried. The fuller's earth of the hills is generally found in shallow basins covered by a few feet His excellency Mr. Becomment, minister of state, of surface soil. Below this is a layer used by the world's navies a type gun of plastic clay from 2 to 6 feet thick. and then layers of fuller's earth from referred by a properly determined fac-2 to 12 feet thick overlying a bed of allowed to remain in the sun, where it undergoes a certain amount of bleaching, turning from a greenish color to a creamy white and losing about

50 per cent of its weight. The United States produces a considerable amount of fuller's earth, something like 20,000 tons a year. The discovery of a superior grade of the earth in the Black Hills will mean, in a short time, the adding of another raw material to the already long list found in the hills.

Eastern parties are negotiating for the deposit of limestone, called by some alabaster, that has been found in Custer county. The stone is found in a 30 foot ledge, and when it is quarried it is soft enough to be cut into any shape desired. After being exposed to the air it becomes hard and takes a beautiful polish. The quarry is being opened by two Deadwood men.

# Wilhelmina's First Love.

Although romantic writers have made much "copy" out of the Dutch quieu's approaching marriage, it is well known at The Hague that Duke Heinrich is not the young man who originally caught the royal fancy of the young queen, says the New York Commercial Advertiser. The first favorite was Prince Adolf, Heinrich's elder brother and a very good looking young officer. "Willful Wilhelmina" smiled most amiably upon him, and in due time the proper authorities were commanded to sound the prince on the subject. But Adolf was coy and too fond of life and gayety to consent to become the consort of the imperious young person who rules over the most peaceful court in Europe. Adolf refused to be wooed, and it was an open secret at court that the queen's disappointment and chagrin were the cause of the prolonged delay in the announcement of her engagement to the younger brother. At the same time the good Hollanders tell each other, with much satisfaction, that Heinrich is beloved of Wilhelmina, or she would never never wed him-not if a hundred ministers were to ask her to.

An Edible Bamboo Discovered. A remarkable incident is officially re-

ported from the central provinces of Incia, according to a London cable to the Chicago Tribune. Bamboos have been found yielding "manx" of a kind and quality hitherto unknown and have been of invaluable help to the famine stricken people. A government analysis revealed that it is a composition of saccharose, almost identical with cane sugar, the ingredients being sugar, 95.63; water, 2.66; ash, .96; glucose, .75. Expert officials and natives never heard of such a product of bamboo. and the natives regard the discovery as a special act of Providence.

# SHIPS' FIGHTING VALUE

German Naval Anthority's New Way of Estimating It.

LIKELY TO BE VALUABLE FOR NAVY

The Results as They Affect American Naval Vessels Shown by the Method Proposed by Otto Kretschmer-Japan, It Appears, Leads the World In Battleships.

The German chief naval constructor, Otto Kretschmer, has proposed a new method of estimating the fighting value of ships which promises to be of use to the navy, to the coast artillery and to shipbuilders, says the New York Sun. The idea is to generalize and combine the various qualities of a ship and exministry of justice, ex-delegate of Spain to the press their total value numerically in conference on private international law at The such a way as to apply us to compens all warships directly for their all around fighting worth. All essential qualities are taken into consideration, as will be seen, and although in all its details the method appears complicated it is in reality very simple.

The general proposition is that for a given displacement the best ship has the highest fighting value, consequently the figure of merit of a ship may be value divided by its displacement; in other words, it is its fighting value per ton of displacement.

Its fighting value is really the sum of two values, one passive (the armor protection) and the other active (the gun power, the speed, the coal supply, ete.). The passive value is composed of three parts-the broadside, the bow and the stern protection respectively, the deck protection being included in the broadside protection.

The active value is composed of four parts-the heavy gun power per second, the power per second of the guns of medium caliber, the speed of the ship and its coal power and capacity. The gun power is determined from the number of guns, their caliber, the energy of the projectiles, the angle of fire which the gun carriages or mounts permit and the rate of fire.

The effect of the ship's speed is such that it enters in the third power, especially relative displacements are about in the ratio of the third power of the speeds. The coal power, or vital fightcoal capacity by the sum of the indicated horsepower and the coal used per hour and per indicated horsepower. It will thus be seen that all the essential elements of a ship's construction, armament and machinery enter into the problem.

In order to compare the relative efficiencies of the various kinds of guns is selected to which all other guns are tor. The British 12 inch guns on the sand. Fuller's earth is dug out and | Duncan are selected by the constructor as the unit of reference. In the calculations all the data are taken in the metric system, and it is assumed that 0.8 kilogram of coal per hour and indicated horsenower is consumed by every ship at the tighting speeds.

Finally, to have some ideal ship with which to compare all others, one is se lected with a figure of merit of 1,000; consequently the figure of merit of any ship becomes the thousandth part of the calculated total fighting value, not considering the displacement. In this way the following relative fighting values (figures of merit) have been deter-

TABLE TALK.

Points About Arrangements For a

Ceremontous Luncheon or Dinner. At a ceremonious luncheon beef tea and bouillon are served in covered cups or in small Chinese bowls with saucers. Shell fish, croquettes, broiled chicken, chops and salads are stable dishes for luncheon, with ices, tarts and fancy cakes for dessert. Ten and chocolate are the usual beverages. At a formal luncheon the courses are served as at dinner. The salad may correctly be quite substantial, and lobster, chicken and oyster salads are very favorite dishes.

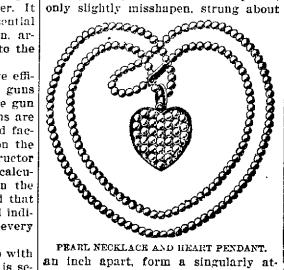

For dinner, after the cloth is smoothly spread, place a pretty centerpiece in the center, and on this a dainty and artistic arrangement of flowers or fruit. The silver for all the courses may be placed on the table when it is set, or it may be placed as required for each course. At each place lay a napkin with a thickly cut piece of bread upon it, a glass of water, a dinner plate and the necessary knives, ing is admissible upon the table at a not train the perceptive faculties. formal dinner or luncheon but the flowers, fruit, salted nuts, bonbons, accepted.

LOOKING AND SEEING.

THERE IS A VAST DIFFERENCE BE-TWEEN THESE TWO ACTS.

It Is Important to Cultivate the Power of Observation Even in Ordinary Things - A Faculty Possessed by All, but Developed by Few.

It is the hope and desire of all parents that their children shall make some sort of a mark in the world when they grow up. They do not in the majority of cases expect that their offspring will become famous and make names that will live for ages, but they cherish the thought that they will be successful men and women in some profession or business. That is the keynote, that success shall be their portion.

Yet it is a fact that most parents neglect or pay very little attention to and invigorating the whole system. one part of the child's education which forks and spoons. Besides these noth- is of the highest importance. They do

Power of observation will help you more than anything else in your strugolives and other relishes, the candela- gle for existence, and yet there are bra or bouquet lamp of course being comparatively few people who are keen observers. One small fact will Unless the dinner is served a la Russe prove this latter statement. The man the hot soup places and soup tureen who observes everything, he who sees taken as the quotient of its fighting are placed before the mistress to be everything he looks at, is singled out It overcomes all forms of blood poison, served by her. When the tureen and either as an inquisitive person or a soup plates have been removed, the clever one, and this shows that he is

in front of the master with fresh hot | It is easy to give instances of this plates. The vegetables may also be lack of perception even in the ordinary upon the table. The salad and dessert, things of life. Some years ago an artare both served by the mistress. If ist engaged in a London firm of printfruit is served, it should come next and 'ers had to draw an advertisement in then the coffee. It is well to accustom which the central figure was a cock in quite small children the use of finger the act of crowing. Nothing seemed bowls, etc., as they may thus be spared 'easier, but when he set to work the much nervousness and embarrassment artist found himself confronted by a when away from home in more pre- difficulty-does the cock show its tentious households. Finger bowls are tongue prominently when it crows? brought in just before the fruit is . Every one of the hundred men employpassed. A dainty doily is placed on ed by the firm had seen a cock crow each dessert plate and the firzer bowl scores of times, yet not one of them is placed on this. The bowl should could answer the question. The artist only be about a quarter full of water, had to go to a friend who kept fowls The doily and bowl should be lifted and chase the poor rooster round and

A schoolmaster, wishing to test the perception of his boys, asked them how many times they had seen a cow or pictures of that animal and found, as he had expected, that all the boys had seen the creature more times than they could remember. Then he offered to give small prizes to the boys who could correctly answer this question, "Are a cow's ears above, below, in front of or behind its horns?" Only two boys gained prizes, and theirs was guess-

Now sit down and test yourself in some such simple manner. You have all seen a horse "down." Can you describe how it rises? Does it get up on its fore feet first and then on its hind feet or does it kneel first, then get on its hind feet and finally on its fore

However, you need not confine yourself to the animal kingdom in testing your perceptive faculties. Many subjects will suggest themselves to you on reflection.

As an excuse for this want of observation it is often urged that "a man can't know everything," but the excuse tractive chain. Other chains consist is a bad one. There is a great difference between knowing little or nothing and knowing everything. When the faculty has been trained, it requires no more effort to note the points of the object looked at than it does to glance at that same object and come away

The chances of success in life are on the side of the man who knows cerof having to go to a book for all that pensable, as there are so many things which cannot come within the range of our observation: but, wherever possi-

This will explain why men who cancultivated by very few.

The perceptive faculty must be trained during childhood and youth. After the completion of the twentieth year very little progress can be made. A grown man is unable to develop his powers of observation to any satisfactory degree. Youth is full of energy, and that is the time to inculcate the lesson that we should see all that our eyes fest upon.

It should be the object of every parent to teach his child to note every obbe told to observe the shapes of the leaves on the different trees, the paling of the color of animals toward the under part of the body and so on and should be told that when asked a question on the subject he must be prepared to say that it is so, not that he thinks it is.

All children have inquiring minds, and after a walk or two, coupled with such instruction as we have mentioned, you will find the child making great progress and acquiring a quality that will be invaluable to him in after life.

One of the methods adopted by Houdin, the conjurer, for quickening the perception of his son was to make him walk rapidly past a shop window or a stall on which a number of articles were displayed and then write down a list of the objects noticed. At first only half a dozen articles were perceived during the moment occupied in passing the store or window, but after having done it once a day for a month the boy was able to make a list of 40 objects.-Pearson's Weekly.

Coffee as a beverage had a slight start of tea in London, for the first coffee house was opened about the year

# Scrofula THE OFFSPRING OF HEREDITARY BLOOD TAINT.

Scrofula is but a modified form of Blood Poison and Consumption. The parent who is tainted by either will see in the thild the same disease

BENEFICENT ENZIMES.

Ferments That Check Disease, Cure

Tobacco and Improve Butter. By the recent resignation of Dr. Oscar Loew the agricultuaral department has lost one of the most noted scientists in its employ. Dr. Loew leaves to become lecturer on agricultural chemistry in the agricultural college of the Japanese Imperial university at Tokyo.

He will receive a salary of \$7,000 in addition to quarters in the university and other perquisites. Dr. Loew's specialty was the investigation of what are known in organic chemistry as enzimes, a subtle species of liquid ferments that are neither microbes nor fungi, but somewhat similar to both. He found that certain of these ferments were present at the culminaring stages of practically all the virulent diseases and that it was the development of the enzime in the system. that checked the disease and killed the microbes when a disease like typhoid, smallpox or yellow fever had run its

course.

From this discovery it was

but a step'to decide that if the enzime

could be introduced into the system of

a patient the disease would be checked before it had run its course and the patient have a much better chance for recovery, says the New York Sun. It was a long and infinitely patient Investigation that established this fact. Dr. Loew finally succeeded in selecting a particular enzime which, while not harmful to the human system, would dissolve and kill the microbes of yellow fever, scarlet fever, typhoid, smallpox, bubonic plague, diphtheria, tetanus and other diseases. Like all other investigations of this sort the experiments had to be made first in the laboratory test tubes, then on the lower animals and finally on human beings. In Japan Dr. Loew proposes to

carry on extensive hospital experiments with the enzime before turning the discovery over to the medical profession at large. He hopes especially to try it under practical working conditions on a large number of plague patients.

The work Dr. Loew carried on at the agricultural department in connection with tobacco curing promises to be of great commercial advantage to this country. It has been known for a long time that the critical stage in the curuse of the power possessed by all, but | ing of high grade tobacco came while the leaf was passing through the period of fermentation, when by some method not generally understood it developed the aroma and flavor that fixed its market value. Dr. Loew found that this fermentation was controlled by another enzime and that when the nature of the enzime or ferment was understood it would be possible to push or arrest its development almost as a photographic plate can be weakened or intensified in the darkroom. The improvement of the tobacco output of ject that comes in his way. When out the country resulting from this discovfor a walk in a park, the child should lery would have an importance hard to overestimate.

Professor Loew was also engaged in similar experiments with butter and cider. The flavor of butter is held to be due not to any excellence in the cow or its food, but to the presence of certain enzimes. It was Dr. Loew's theory that he could turn poor butter into high grade butter by introducing the proper enzimes. Experiments were also made with eider wine into which Dr. Loew Introduced the engines which give to Rhine wines and other light wines their flavor. He procured from Germany some of the ferment used in winemaking and sought to develop it so that the farmer could introduce the enzimes into his cider barrel and later draw out a fine quality of white wine. Professor Loew was conducting other experiments with wines, being convinced that the superiority of French wines over American lay not in the soil or the climate or methods employed. but in the flavoring enzimes which enter the casks during fermentation.

Gold in Shop Sweepings. One firm of jewelers in Birmingham, England, receives as high as \$7,500 a. year for its shop sweepings, which are / sold to the highest bidder. Even the pediment of wash basing is saved.

# USEFUL CROCHETING.

SOME WARM AND PRETTY GARMENTS IN ASTRAKHAN STITCH.

A Set For a Child of About Eighteen Months - A Quaint Little Dutch Hood, a Fetching Berlbboned Mutt and a Neat Cape to Match.

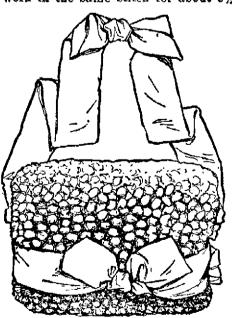

With the fashionable revival of knitting, erocheting, tatting, etc., many things that were favorites of the past come up again, and among them few are more attractive than the soft, warm, comfortable garments in Imitation astrakhan for a small child. With a bone crochet hook, No. 8 or 9, and four ply fingering, make a chain of

any even number of stitches, including the stitch on the hook. Work into the loops an alternate stitch of double crochet (D C) and picot stitch, which is made as follows: Insert the hook, draw the wool through the loop; then through one, six or seven times before drawing it through two. Repeat these two stitches, a D C and a picot to the end of the row; end with 1 D C. Turn with one chain and repeat, but in this and every row bereafter take both sides of the loops. In working, the picots must be kept on one side of the work, toward you in one row and away from you in the next. The garments described and illustrated are worked in the same stitch. Directions are given for the shaping.

For the quaint little Dutch hood take about two ounces of white or gray fingering. Make a chain of 20. Work for about 312 or 4 inches for the back of the crown. In the next row, and with the picots facing you, work to within two stitches of the end. Turn with one chain, and work to within two stitches of the other end. Repeat this row until only seven stitches remain. Break off the wool and with the picots facing you work from the right hand corner of the crown up the side, across the seven stitches and down the other side of the crown. Work from end to end of the crown for three inches, thus forming the top and sides of the hood. With the picots facing you again, work to within 12 stitches of the end (six picots), turn with one chain and work to within 12 stitches of the other end. Work two rows from end to end. Work to within 18 stitches of the end, turn and work to within 18 stitches of the other end, Work two rows from end to end. Work one row more from end to end and around the back of the neck, missing two stitches (1 D C, 1 picot) four times in the center of the back. Work once all around in D C and finish off. This hood looks better lined with a thin silk, but it is not necessary to do so.

For a muff to match use four ounces of fingering. Make a chain of 60 and work in the same stitch for about 91/2

112 or 2 inches more than the breadth. Line with cotton wadding or down and thin silk or sateen, and finish with ribbons or cord and bows.

A neat little cape in the same style to complete a set for the baby can easily be fashioned by any one familiar with this kind of work.

in a deep covered vegetable dish.

### ABOUT BEES. A friend writes inquiring why we do

not say something about bees in these

notes. Others have made the same inquiry. Replying, we say that we do not like to write about subjects or phases of agriculture which we have not had a practical experience with. Unfortunately there is no natural affinity between bees and the writer. They invariably sting us if we ever go near the hive, and, while we never cease to admire the wonderful intelligence which dominates the life of these most valuable little servants of man, we like to do it at a safe distance from their corporate residence. The ability to successfully handle bees is a sort of natural gift, some persons being born with the bee instinct just as some are born with a sort of pious way with them, and if one is not born that way he had better buy his honey. There is appeals to our natural instinct, especially the thought that the bee, works for one for nothing and boards himself; that he keeps everlastingly at it the points omitted. and does not mind being robbed of his earnings. It is hard to conceive of a more enviable lot in life than to lie out pass errors and not in points, the use of in a hammock under the apple trees and realize that a hundred hives of bees are all at work in your neighbors' gardens storing up honey for you at the rate of \$2.75 a day and you dream | right from zero degrees at north to 90 ing, fulled by the drope of their humming. It helps the ineffer to know that your neighbor, whose erchard bloom is being thes reided, is shoveling dirt on the road at \$1.50 per day or digging away for dear life to get his corn planted. The bee is surely a godsend to the constitutionally lazy man and all those who may be born tired. In this particular we commend the business to many of our readers. The only thing which in any way approaches this bee business is to keep a hundred old hens and then go and lie down on the sunny side of a straw pile in April and listen to their cackling while they turn out a couple of dollars' worth of eggs and you with nothing to do but to go and gather them up. We have written thus lengthily of the bee business because it may prove of some help to such of our readers as enjoy making a living without much effort, for lazy folk can get along if they only know how. We might add that on general principles, being a good American citizen, we are opposed to the form upon which the bee administers his government-a queen, you see, then a large class of industrious workers and another of drones who just lie around and live off the others. This is all very undemocratic and un-American, though we do get a most valuable lesson from them of the beauties of co-operative effort. After all, we can learn much from the bee, and some can make money by keeping them, but we were not born that way.

### STEER VERSUS COW. The inquiry is made as to whether

the \$50 an acre farm of the west can be devoted to the production of beef. This is a question of very great interest to many farmers who have prospered with the dairy as the leading interest of the farm and who now would be glad to carry on the farm on lines which would not involve so much hard work and render them less dependent upon the caprices of hired help. We look at this matter thus: With the population of the country increasing more rapidly than its beef supply there is nothing to indicate much lower prices for good beef than now obtain. Assum-Ing that this price is \$5 per hundredweight for a well bred 2-year-old steer and that such steer can be made to weigh 1,200 pounds, which figures, both as to price and weight, are placed, we think, within very conservative limits. we have the proposition clearly stated. There is no doubt that this \$60 animal as a machine to work up the raw material produced on the farm can be grown at a handsome profit and at a minimum of work and worry for the man who grows him. While the good steer cannot be made to produce as much money in two years as the good cow, the profit he does return is so much more easily obtained that a man is apt to soon get tired of running a big dairy after he has studied out the problem. This steer for this farm, it is almost unnecessary to say, must be a high bred fellow-a Dobbie, Galloway, a Shorthorn or a Hereford. He should be all beef, with not a taint of dairy blood in his make up. He runs with his dam as long as she will suckle him and is then pushed to make the most of hold their own. The fact is that Gerhim up to 2 years of age. Raised in this manner he is quite likely to grade: up as fancy beef and command a fancy price. Where this change is made from the dairy to the steer the old man and the hired man as they come home from the cornfield on a June evening after a hard day's work will stop and look at the steers in the lot and praise the Lord that there is not two hours' work pulling teats to be done before they can go to bed. Steers, poultry and sheep, while requiring care and attention, still do not compel that sort of agricultural slavery which is inevitably associated with the dairy farm.

Among the many valuable stone deposits of this country are the jasper quarries of South Dakota, the red sand stone deposits of the Lake Superior region, the granite of central Minnesota, the limestone formation of Iowa at Anamosa, the granite of Wisconsin at Montello and the famous limestone at Bedford, Ind. Our country is very rich in building material of this sort as well as in class of the finest quality for brickmaking. As the country becomes older and the supply of lumber becomes exhausted these stone and clay deposits will greatly increase in value and importance.

We got hold of some oleomargarine at a hotel dinner table not long since and would heartily favor taxing the stuff a dollar a pound.

# **UP TO DATE COMPASS**

RADICAL CHANGE PROPOSED BY NAVY DEPARTMENT.

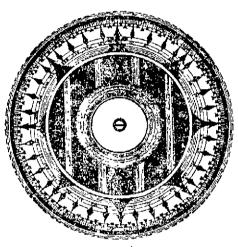

Time Honored "Boxing" to Be Abelished and Degree System Substituted-New Card Har the Advantages

of Accuracy and Simplicity. According to the New York Herald, Rear Admiral R. B. Bradford, chief of the bureau of equipment, has sent to well known mariners for criticism a proposed new compass card designed

by Lieutenant Commander S. B. W. Diehl, superintendent of compasses. The object of the proposed change is to omit the present system of points and fractions thereof and use degrees only. The present card contains points and degrees. The conversion of one inmuch connected with bee life which to the other, Lieutenant Commander Diehl says, is a natural result of the presence of both, but is not a necessity.

> Accuracy requires expression in degrees for courses, bearings and comwhich is but a duplication of work. The circumference of the proposed card is divided into the usual 360 degrees and marked continuously to the degrees at last, 100 degrees at south, 270 degrees at west and 360 degrees at

> The card is subdivided into divisions of ten degrees, accentuated by heavy lines on the graduated rim and by suitable geometric figures on the card, each ten degree division on the card being indicated in figures by its appropriate

NEW COMPASS CARD.

number from zero degrees or north. Each ten degree division of the card is further subdivided into half and quarter divisions and appropriately marked. Every fifth degree line of the graduated circle between the ten degree divisions is marked in figures, indicating its appropriate number from zero degrees or north.

The cardinal and intercardinal directions are emphasized on the card in geometric figures. In Illustration of the simplicity of the proposed card Lieutenant Commandor Diehl compares the present eard of 360 degrees, having \$2 points, one of which represents 114 degrees, one-half point 5.625 degrees, one-quarter point 2.8125 degrees, with the proposed card, also of 360 degrees, which has 36 divisions. one of which equals 10 degrees, onehalf 5 degrees and one-quarter 2.5 de

Lieutenant Commander Diehl says he believes the proposed marking of the compass card would result in greater accuracy in navigation in its relation to the compass. Courses would be laid in degrees and more accurately noted, as the approximate course of S. W. by W. 1/4 W., "a little westerly," for example, would be replaced by the exact course of 240 degrees.

Chances of error in the application of the deviation to compass courses would be lessened. Conversion of points into degrees and the reverse would be eliminated from the problem. Boxing the compass would be a matter of a few minutes' instruction to the layman of average intelligence. Sailing directions would be simplified. All work in relation to the compass would be facili-

# American Pencils Gaining.

The German pencil trade is suffering severely from competition of American lead pencil makers. The ingenious labor saving machinery of American factories and their large scale of production, and especially cheaper prices at which they can supply themselves with cedar wood, are the chief causes for the failure of German makers to many is practically dependent upon the United States for her supply of cedar and the best of the wood is kept in America.-Scientific American.

# Miles of Glands.

R. E. Edwards',

There are 2.400,000 sweat glands on is two and a half miles.

## OCEAN TELEPHONY SOON. Scientists Believe That This Difficult Problem Has Been Solved.

According to a recent issue of The Electrical Review, a telegraph and telephone company has purchased the patents of Dr. M. I. Pupin of Columbia university, which, it asserts, cover the art of ocean telephony and enable telephone messages to be sent over any length of land lines. It adds that the sum of \$200,000 has been paid to Dr. Pupin for this invention, with an an nual salary of \$7,500 to him during the life of the patents.

Two patents were issued in June, 1900, for the invention referred to, which is described at length and characterized as one of the most brilliant and exceptional inventions of Dr. Pu-

It had been thought necessary in order to talk a given distance, say 500 miles, with underground cables to employ large copper wires thickly covas would speedily be recognized were ered with insulating material. The expense of such wires and material has been sufficient to prevent the construction of long underground circuits.

Dr. Pupin's invention, it is declared. furnishes a method whereby conductors of relatively small diameter covered with insulving material of moder ate thickness may be used in place of the large and expensive conductors formerly thought accessary. It is difficult to express in nontechnical language the theory upon which the invention is based, but it may be said to be a method of "fighting fire with fire." One difficulty with which telephonists most contend is what they call "self induction," another is "static retardation," and a third is known as "resistance."

Dr. Pupin has placed these various difficulties in such a settled relation that they have expended their malign influence upon one another and have left the telephone current free to proceed upon its way unmolested. In other words, he has "set a thief to catch a thief," and these disturbers expending their evil strength on themselves neutralize their destructive qualities. The article finishes as fol-

"Experimenting with artificial conductors, Dr. Pupin discovered that it was possible to telephone over vastly greater lengths of cable than had ever been possible before and is able to make any desired length of telephone circuit easily possible. He has shown a design for inductance coils to be introduced at appropriate intervals in a transatlantic cable, which would allow telephonic conversation to be held across the Atlantic oceau.

"It is believed by those who have investigated the subject fully that the improvement which his inventions con template will enable telephony over land lines of any length that are in use today and solves the difficult and attractive problem of ocean teleph-

## We Lead the World.

The United States seems likely to stand at the head of the world's list of exporting nations in the year 1900. During the past five years only the United Kingdom and the United States could be considered as competitors for the distinction of being the world's greatest exporter of articles of home production. In 1894 the United King dom led the United States by nearly \$250,000.000, and in 1897 the United States had so rapidly gained that she was but \$60,000,000 behind. In 1898 the United States took first place, our exports in that year exceeding those of the United Kingdom by nearly \$100,000,000. In 1899 the United Kingdcm again stood at the head of the list, her exports exceeding those of the United States by nearly \$35,000,000.

In the 11 months of 1900 the domestic exports of the United States exceed those of the United Kingdom by \$5. 473,670, and should this rate of gain be maintained in December the United States will in the year 1900 show a larger exportation of domestic products than any other nation in the world. Comparing the growth of our export

trade during the last quarter of the century with that of the other great nations of the world, we are able to better measure the wonderful progress shown France shows no increase in her exports of domestic merchandise in the closing quarter of the century. Germany shows during the same period an increase of about 50 per cent, and the United Kingdom shows from 1875 to 1900 an increase of nearly 40 shows during that time an increase of practically 200 per cent. In 1875 the exports of domestic merchandise from months of 1900 the United States ex. ger and Ticket Agent, Chicago, the human body, each one-fifteenth of ported goods worth \$1,308,913,789. amounted to \$1,303,440,000.—Philadel;

Recent reports to the adjutant general of the United States show that the aggregate force of the national guards of the various states is considerably larger the army reorganization bill. The reports of the various state adjutant generals show a total enrollment of 113.967, called into the field.

all be filled by Democrats, the Republi-Delaware, two in Nebraska, and one that party has a majority in the legislature of each state. Should all the seats a majority of twenty. Unfortunately, life and thus to hamper German indus-Delaware is a disgrace to the state and Senator Lodge, and is helping to prodifferences among the leaders, may lead to unforeseen results.

The reports recently prepared by Staistician Hitchcock of the foreign commerce of the United States make a most Its Possible Effect Upon the W. & L. satisfactory exhibit. For the year 1900 the exports were forty times as large as year about forty-nine per cent were agricultural products, a marked change from the rule of a few years ago. The excess of exports over imports, \$520,000,-000, gives the country a large return in gold to settle accounts of such magnithreat of Germany to put higher tariff barriers between the American farmer and the German market.

Among much other interesting in formation brought to light during the discussion of the ship subsidy bill in congress is the fact that during the past sixty years Great Britain has paid to ing the year 1897 British ships were paid for sea postage. Great Britain will not send her mails abroad by foreign ships unless the writers distinctly specify on the envelopes that they desire their mails: carried by other than British ships. A contract was once let to the North German Lloyd Steamship Company by the British government for the carriage of British mails from Southampton to New York at a rate about one-half of what properties. Great Britain was then paying to the Cunard and White Star lines, but the opposition to this policy was so strong that the British government was forced to cancel the contract.

The resolution offered in congress last Saturday by the Hon. Seth W. Brown, of the 6th Ohio district, who, fortunately, failed in his effort to be re-elected on the Republican ticket at the last election, declaring it to be the intention of the United States to relinquish the sovereignty of the Philippines, calls for the brinus brick works, heretofore exclu gasoline, and then applied the match. following comments in the New York sive territory of that property, and be-

"No wonder the Hon. Seth W. Brown's speech on Saturday commanded the hearty approval and the enthusiastic present on the floor. Mr. Brown's proposed method of dealing with rebels in arms against the flag differs in no respect from Mr. Bryan's. Brown and Bryan stand shoulder to shoulder on this question. Bryan made it an issue of the presidential canvass, and the people of the United States had their say about it on election day. Brown borrows it from Bryan and puts it before congress on his own responsibility; and the only novel feature of his presentation of it is in the circumstance that the proposal to abandon our sovereignty, to

# ROAD FROM LAKE TO RIVER.

E. and C., L. & W.

It became known yesterday that Calthose of 1800, while the imports were vary Morris and H. A. Garfield have only ten times as great. Of the grand formed a syndicate which is behind the total of \$1.370,763,571 exports during the proposed new railroad lines between Cleveland and Wheeling and between Fairport and the coal fields of Jefferson county. The syndicate will float among the banks of Cleveland securities amounting to \$7,000,000 or thereabouts. The prospectus, which has been issued securities or a tremendous credit ball to the bankers of Cleveland, announces ance, for there have been no imports of that the syndicate has purchased the first mortgage bonds of the Ohio River tude. Since more than one-half of our & Lake Erie Railroad, thus obtaining total exports is other than agriculture possession of that property. It has pur- she fell. the nation need not be alarmed at the chased enough of the stock to give it a controlling interest in the Alliance & Northern Railroad, and is now negotiating with the minority holders for their shares at \$35.

The syndicate has purchased of the estate of J. W. Wardwell 2,000 shares of stock in the Wheeling & Cleveland Railway Company, the face value of the shares being \$100. This gives the syndicate a line from Phalanx, on the Eric British ship owners, as postal subsidies, railroad, to Alliance, the Alliance & the enormous sum of \$240,000,000. Dur-| Northern; from Alliance to Bergholtz. the Ohio River & Lake Erie; and after \$3,854,715 for carrying the mails, while building a short strip of track for which the government received but \$575,340 the right of way has been obtained, con- Hollenbeck was in Massillon for Sevnects with the right of way of the Wheeling & Cleveland, which has a terminus at Martin's Ferry. Eventually the railroad will go into Wheeling. The line will open up new coal fields in Ohio and may be a tremendous blow to the industries of the Wheeling & Lake Erie Railroad and the Cleveland, Lorain & Wheeling, seeing the further plans and the indication of backing from stronger

The feature of the new line is the new conditions it will bring about. It goes into what has been heretofore exclusive territory of the Wheeling & Lake Erie railroad and gobbles up the new coal lands which the company intended to purchase. This leaves the Wheeling line with the Hanna mines at Dillonvale and some other properties which may soon be exhausted, and probably accounts for the efforts of that company to get into other fields. The Morris line seems to be striking desperately at the Wheeling, for it also enters the Gamcomes a competitor for the business. It also makes a new short line from Cleve land to Wheeling which will compete with the Wheeling & Lake Eric in both plaudits of the Bryanite Democrats passenger and freight traffic. It also seems to upset the arrangement made between the Baltimore & Ohio and Cleveland, Lorain & Wheeling whereby the latter road delivers certain coal at Wheeling because the Pittsburg territory is too congested for the Baltimore & Ohio to handle it. In fact, the impression is that this is a Baltimore & since their arrival in that city. Ohio project which is to revolutionize affairs between Cleveland & Wheeling. —Cleveland Beader.

Frank Ertle Arrested at Muncie, Ind.

CASE OF FIRE MARSHAL

eral Days, Securing Evidence to Warrant Taking Ertle Into Custody -Ertle Alleged to Have Committed the Crime in Massillon in May, 1899.

State Fire Marshal H. H. Hollenbeck, of Columbus, was in Massillon Tuesday, taking the last of the testimony he considered necessary to warrant the arrest of Frank J. Ertle, formerly of this city, now at Muncie, Ind., on a charge of The fire marshal has been working on this case for some time past, and on Saturday and Sunday examined a number of witnesses. From here Hollenbeck went to Columbus, where the necessary requisition papers for bring-

ing Ertle back to Ohio will be made out.

It will be remembered that a fire broke out in the property occupied by Ertle and his family in North street, on May 4, 1899. It is alleged that Ertle saturated the furniture of a room in which his wife and children were sleeping with The fire was discovered before much damage was done. At the time of Ertle's disappearance from Massillon there also disappeared a young woman by the name of Miss Tillie Andrews, who came here from Navarre.

A dispatch from Muncie says that Ertle has already been arrested on a charge of arson, at the instance of the fire marshal, and that he will shortly be brought back to Ohio. The dispatch says that Ertle, with Miss Andrews, has been conducting a hotel in Muncie ever

For the weakness and prostration following grippe there is nothing so prompt and effective as One Minute Cough Cure. This preparation is highly endorsed as an untailing remedy for all throat and lung troubles and its early use prevents consumption. It was made to cure quickly. Chas. W. # THE CANTON VETERANS.

Many of Them Respond to the Invitation to be Piesent at the Celebration -Addresses by the Rev. Dr. J. I. Rev. N. E. Moffit.

Massillon and Canton ex-soldiers joined, at the G. A. R. hall, Thursday evening in commemorating the birth of Abraham Lincoln, which occurred Feb. 12, 1809. The Cantonians present were R. A. Cassidy, Nathaniel Aikens, Sheriff J. J. Zaiser, Frank Williams, Fred. Mc-William Wagoner, E. Fessler, T. C. Snyder, Charles Ite, John Rittensbaugh, George Young, John C. Smith, A. Bressler, William Goodman, H. W. McMurray, G. Ryan, B. W. Smith, George Foster. Frank Taft, Lyman Ensign and Mr. Brinkert. From Louisville there were present Frank Wittenberg and Sylvester Lochoit.

An entertainment programme was carried out. It included vocal solos be Miss Bessie Vickery, Mrs. Carrie Gould and David Vaughan; piano solos by Mrs. Clara Dissinger and Miss Daisy Holston, and recitations by Miss Kittle Hagan and Miss Vera Gould. Addresses were delivered by the Rev. Dr. J. I. Wilson, the Rev. N. E. Mossit and Prof. E. A. Jones. Henry Oehler was the The next meeting of the Stark County | chairman of the evening. At the conper was served by the Daughters of Vetsing, William Brown and O. C. Martin.

The Rev. Dr. J. I. Wilson dealt w t'i the early life of Lincoln. He said that Conferences of the persons interested the year 1809, in which Lincoln was have been held, and, if the report is half born, was distinguished because it also gave to the world other persons who have played important parts in its history. He alluded to Darwin, the famous scientist, who was born on the same day in the same year as Lincoln. He also mentioned W. E. Gladstone, Mrs. Browning and Edgar Allen Poe. Dr. Wilson traced the career of Lincoln trom his childhood days in Illinois, his trials as railsplitter, grocer's clerk. member of the legislature, lawyer and congressman, dwelling upon the leading events which were connected with the development of the magnificent character which will always live in American history. Dr. Wilson described the scenes which characterized the famous meeting of Lincoln and Douglas, at memorable debate. Lincoln's determination, against the advice of his closest friends, to ask those famous questions, Dr. Wilson believed was prompted by a divine inspiration, for it was the answers to these questions that eventually and indirectly made Lincoln president and gave him the opportunity to strike the shackles from the limbs of four millions of human beings in the United States.

"Did ever a man start lower than Abraham Lincoln, and did eyer a man climb higher?" asked the Rev. N. E. Moflit in the course of his brief address. "Lincoln's was the true type of American manhood. He was reared in the very deepest of poverty." Mr. Mosiit compared Lincoln with Ceasar, Cromwell and Napoleon, and he defined the qualities which give the American the foremost place in the world's array of great men. The United States, he said, never knew the meaning of liberty until Abraham Lincoln, in his emancipation proclamation, enunciated its principles. Mr. Mofit held Lincoln to be a greater man than any of those he had mentioned, because of the struggles he had had his entire life. The history of the others has more to do with palaces and luxury than with poverty and toil. The forms of government established by the three illustrious men he had named were oppressive, while Lincoln always stood

for liberty and the uplifting of man, Prof. E. A. Jones, in his remarks, said that there were orders of greatness; that while all the nation and particularly those men who rallied around the flag in the sixties, admired Grant, Sheridan and Sherman as leaders of men and commanders of armies; that while Newton, Agassiz and Franklin were admired, Lincoln was not only admired-he was loved. The greatness of Lincoln, he said, was a moral greatness-that quality which leads men to lay down their lives their all on the altar of the country unselfishly. Mr. Jones spoke of the events of the time of Lincoln's nomination and election, nothing, said he, so plainly showed the greatness and as the plain evidences of personal grief which were so general on all hands when the news of the assassination was spread. Tears were shed by eyes that had not wept for years when the awful calamity was learned of. There was grief on the faces and in the manner of all people, young and old. Lincoln was a man of the people, and in his death

every citizen felt that he had suffered a personal loss. Do you read the want columns daily \*

Buildings.

First Appeared in the Grocery of Warth & Lux, Near a Chimney at the West Wall-Strue ures Burned Belonged to Peter Wilhelm, D. Jones, Mrs. Louise Winoldt and John Sheehan -Gross Loss,\$33,000; Total Insurance, \$20,715 - A Hard F re to Fight.

Aided by a stiff wind, with quantities of oil, powder and other combustibles to add fuel to the flames, a fire for five hours burned among the buildings be-Wilson, Prof. E. A Jones and the tween the Humberger block and Muskingum street, Tuesday night. Five buildings are considered completely ruined by their owners. The total gross loss, as estimated by the fire sufferers, is \$33,000. The total insurance is given as \$20,715. Mrs. Louise Winold owned two of the buildings, one a brick and the other a frame. They adjoined each other. Peter Wilhelm, John Sheehan and Dav d Jones owned the other three structures. A trifle more than a year ago the same properties were damaged by fire.

Following are the loss and insurance figures, as given by the owners of the property destroyed:

Peter Wilhelm-Considers every thing, building and contents, totally de stroyed Value of building, \$1,400, stock, \$800; fixtures, \$200; total insurance, \$1,

John Gabele-Conducted barber shop on second floor of Wilhelm building. Everything a total loss. Belongings valued at about \$100; no insurance. John Sheehan-Proprietor of building

occupied by Smith. Estimated loss \$2.000; insurance, \$1,400. J. R. Smith-Conducted bicycle store

and repair shop on first floor of the Sheehan building, and had living apart ments on the second. He saved some property. Damage, \$500; insurance, D Jones-Building, saloon, stock and

fixtures valued at \$2,700; insurance, \$1,-700. Considers everything completely ruined...

Twentieth Century store-Owned by J. R. Porter, Canal Fulton; managed by George Rhine, of this city; located in Winoldt building; damage estimated at \$7.500; insurance \$5,000. Mr. Rhine and family lived above the store. Carria insurance on household goods.

Adam Blank—Living apartments up stairs in Winoldt block. Loss, \$1,000: insurance, \$500.

J. A. Byerly-Living apartments in Winoldt building. Loss, \$500; insurance, \$300. John Gow & Company-Manager An-

drew Gow estimates the damage at \$3,-000; insurance, \$2.000. Warth & Lux-Conducted grocery in

west hall of the Winoldt brick building Estimate damage at \$2,000; insurance, H. R. Hintz-Shoe manufacturing and

repairing shop in east half of the Winoldt brick building. Loss, \$600; insurance, \$490. Among the property destreyed were fifty pairs of shoes sent from the state hospital to be repaired.

Mrs. Louise Winoldt-Proprietress brick and frame buildings; lived in a part of the brick. Estimates value of building at \$10.000; insurance, \$5,225. Loss in household goods, \$600: insur

The alarm was turned in from box No. 33, at the corner of Main and Clay streets, at 6:07 o'clock, by Ernest Hall At almost the same instant Edgar Miller, from the Milleronian hotel, telephoned to the Central engine house. Mr. Miller saw fire about the caves of the building occupied by Lux & Warth It was Claude Musser, a plumber, and a newconier in the city, who told Mr. Hall of the fire, "I was passing the grocery," said Mr. Musser, Wednesday, "when I noticed smoke and flame in the place. I started to go in and offer to help put the fire out, when a man came running out of the place and said there was no use, but that the firemen should be called at once. I didn't know where to find an alarm box, so I told the first person I met and he sent in the alarm."

Messrs. Lux & Warth are of the opinion that the fire originated from a chimney running between the wall of their store and that of John Gow & Company. "The first I saw of the fire." remarked Mr. Lux, "was a blaze coming up by a window near the chimney. The chimney is not used by us, but is connected with a stove in Mr. Gow's store. The fire seemed to be so great when we first noticed it that we saw we could do nothing, so we gathered up our coats, put our books into the safe, locked it and hurried out. Someone turned in an alarm an instant after we reached the sidewalk."

When the alarm was received at the spond. One of the regulars was at supper. Arrived upon the scene, Fireman Baatz went into the cellar of the hardware store with the chemical hose from they should cause delay." the new apparatus. The flames then seemed to be above his head. He worked forward and backward through the which had been sent to him for repairs cellar, Policeman Wissmar being with All were lost. him part of the time. As soon as any one is attacked with la grippe Peruna should be taken every two hours during the day-adults tablespoonful, children a teaspoonful. But it is the after-effects of la grippe which are generally the most serious unless Peruna is taken. In all cases where Peruna is taken as above during the acute stage the recovery is prompt and complete; but where the ordinary treatment is followed the patient will complain for weeks and months of weak. ness, slight headache, want of appetite, and many other symptoms of low vitality. Such people should begin at once the use of Peruna-a tablespoonful before each meal, gradually increasing the dose to two tablespoonfuls. Mrs. Theophile Schmitt, wife of the

Ex-Secretary of the German consulate, writes the following letter to Dr. Hart. man in regard to Peruna:

3417 WABASH, AVE., CHICAGO, ILL., The Peruna Medicine Co., Columbus, O.1 Gentlemen-"I suffered this winter with a severe attack of la grippe, and having repeatedly heard of

the value of Peruna in such cases, I thought would try it. I used it faithfully, and began to feel a change for the better the second day,

After using three bottles I not only found the la grippe had disappeared, but my general health was much better. f am satisfied that Peruna is a wonderful family remedy, and gladly endorse

it." Yours, Mrs. Theophile Schmitt. La grippe is epidemic catarrh. Perunacures catarrh wherever located. Send for a free copy of "Winter Catarrh." This book contains a lecture by Dr. Hartman, Columbus, Ohio.

sion of powder in the hardware store hei hborhood frequently to thaw their occurred, and he was hurled from his cothing. As it was, a number of the feet by the shock. # DIED OF PARALYSIS

Sudden Death of Augustus T. Skinner.

# A LIFELONG RESIDENT,

For More Than Halfa Century He Had Been Connected With the Business Interests of Massillon - Funeral Fervices Wednesday Afternoon at 2:30

Augustus T. Skinner was stricken with paralysis at 6 o'clock Sunday morning, and death occurred five hours later. He never regained consciousness. Funeral services will be conducted at the residence, at the corner of Tremont and East streets, at 2:30 o'clock Wednesday afternoon. The Rev. C. M. Roberts. rector of St. Timothy's church, will offi-

Mr. Skinner was a son of the late Charles Skinner, and was born in Massillon in 1824. His marriage to Cecelia A. Van Rensselaer, of Canton, took place in 1849. The death of Mrs. Skinner occurred in New York in May, 1880. The children surviving the deceased are: Charles G. Skinner, of Cincinnati; Rob-Marseilles, France, John V R. and Miss Bessie V. R. Skinner, of this city. Mr. and Mrs. Charles G. Skinner will arrive in the city this evening. Robert P. Skinner has been notified by cable.

The deceased was well known throughout this part of the state, having, in the half century in which he was engaged as a dealer in wool had business transactions in practically all of the towns of this and surrounding counties. Everywhere he was esteemed for his scrupulous, honesty and those other qualities which made him thoroughly a man and a citizen.

The grandfather of the deceased, Al-Nander Skinner, with the fate Charles K. Skinner and the late Thomas Roach, conducted a woolen factory near the foot of what is now known as Rodman street, in Kendal. It was the grandfather of the deceased who erected the brick building at the corner of Front and Rodman streets, which was the first structure of the kind to be built in this township. The father and the grand father of the deceased were matives of New England.

NEWSTAPERARCHIVE®.

Four sturdy lives stand between Edward VII and a possible lapse in the succession of the house of Guelph to the British throne. When loyal Englishmen mention his majesty, they are very apt to add "whom God preserve." and this is, in fact, the official way of wishing long life and health to the occupant of the throne. But, as the

DUKE OF CORNWALL AND YORK.

world lately learned, even English royalties are mortal, and the good wishes of his subjects are not likely to prolong the life of his majesty when the last call comes. It is, at any rate, some comfort to the

wellwishers of the dynasty that now reigns in Britain to know that they are of a long lived and prelific stock. For two generations at least the succession in a straight line is assured, and it seems likely that the present royal family of the "tight little island" will continue to reign until some change takes place in its form of government.

The present heir apparent to the Brittsh throne is George Frederick Ernest Albert, duke of Cornwall and York, who when he assumes the reins of government will be known as George V. He was born on June 3, 1865, at Marlborough House, the London residence of the former Prince of Wales.

The Duke of Cornwall and York is not yet the Prince of Wales, and reference to him as such is somewhat premature. That title does not descend by right to the eldest son of the sovereign, but is conferred on him by royal patent. Edward VII was made Prince of Wales when he was 4 weeks old, and he will no doubt in the near future confer the same title on his son. The Duke of York is the second and only surviving son of his majesty, the first having been the Duke of Clarence, who died in 1892.

At the time of the death of the Duke of Clarence he was affianced to Princess May of Teck, and soon thereafter

Photo by Hughes & Mulhus, London.

PRINCE ALBERT AND PRINCESS VICTORIA. rumor connected the names of the princess and Prince George. Queen Victoria heartily approved of the match, and the young couple were married on July 3, 1893. They have four childrenthree sons and a daughter-Prince Edward, Prince Albert, Pringess Victoria and Prince Henry.

Common report has it that the Duke of York before his marriage to Princess May was morganatically united to a she does to the carpets."-London man is a keen, hustling business wodaughter of an English admiral. If | Globe.

FOUR STURDY LIVES ASSURE THE PRESENT SUCCESSION TO THE BRITISH THRONE >

this marriage really occurred, it was invalid in the eyes of English law, and it was diplomatically suppressed. In justice to the duke, however, it must be said that prior to the announcement of his espousal to Princess May the archbishop of Canterbury proclaimed from the steps of the Chapel Royal that there was no ecclesiastical or lelegal obstacle to the union.

The Duke of York has been known as "the sailor prince" of England, for he was educated for the royal navy and has served in it for many years. He entered the navy with his older brother in 1877. He began as a cadet and advanced through all the grades in regular succession. In 1899 he obtained his first command, a torpedo boat, and his latest commission was as commander of H. M. S. Crescent.

The heir apparent is about 5 feet 6 inches in height, but he has not the He wears a full beard, in accordance with the English naval custom. In his manner he is kindly, gentle and unassuming, and although he has a high sense of the responsibilities of his position his general appearance is not that generally ascribed to one born in the purple. In fact, "the divinity that doth hedge a king" is conspicuously absent about the heir apparent to the throne of Great Britain and India. He bears a striking resemblance to his first cousin, the czar of Russia.

The eldest son of the Duke of York is a happy, healthy youngster of 61/2 who does not let the fact that there are only two lives between him and the throne stand in the way of his thorough enjoyment of existence. He is typically English in appearance, sturdy, blue eyed and light haired, with a beautiful complexion. His good looks are shared by his two brothers and their sister. Prince Albert is just over 5 years of age, Princess Victoria is not quite 4, while the baby of the family, Prince Henry, will celebrate the first anniversary of his birth in March.

The English papers abound in stories about the royal grandchildren and pic-

Photo by Lafayette, London, PRINCE EDWARD OF YORK.

tures of them. According to the most recent account, Prince Edward is a 'great pickle"—what we would call a "mischievous little chap"-Prince Albert is "a fine, healthy little fellow," and Princess Victoria is "a charmingly dainty little child, with a delicate complexion and dainty ways."

Prince Henry is of course too young to have attracted the admiring attention of British biographers. He was born at about the time of Queen Victoria's visit to Ireland, and the Emerald Isle expected that he would be named Patrick. That name does not, however, appear in the list of those borne by the child.

Carlyle and His Cat, In a letter of Mrs. Carlyle's, written to her maid Jessie, there is an amusing reference to Carlyle and his cat. Says Mrs. Carlyle: "That cat! I wish she were dead! But I can't shorten her days because, you see, my poor, dear, wee dog liked her. Well, there she is! And as long as she attends Mr. C. at his meals ishe doesn't care a sheaf of tobacco for him at any other time) so long will Mr. C. continue to give her bits of meat and driblets of milk, to the ruination of carpets and hearth rugs. I have over and over again pointed out to him the stains she had made, but he won't believe them her doings. And the dining room carpet was so old and ugly that it wasn't worth rows with one's husband about. Now, however, that nice new cloth must be protected against the cat abuse. So what I wish her state. She conducts her own oris that you would shut up the creature when Mr. C. has breakfast, dinner or

# **AGIFTED FRENCHMAN**

FAUL DESCHANEL, PRESIDENT OF CHAMBER OF DEPUTIES, TO WED.

The Statesman, Poet and Youngest of "the Forty Immortals" Soon to Become a Benedict-The Story of His Brilliant Career,

To be 45 years of age, just in the prime of life; to be handsomer than the majority of men, gifted with genius and an oratorical tongue; to be the president of the chamber of deputies. with splendid prospects of becoming one day president of the French republic, and, best of all, to be one of the 40 immortal members of the French academy-what mòre could Paul Deschanel desire? Only one thing was needed to complete his happiness and to round out his life, and that want M. Deschanel is about to supply. He is soon to be married.

Paul Deschauel is one of the most brilliant men of his age in France. He was born in Brussels in 1855 and is the son of Professor Emile Deschanel of the College of France. Paul Deschanel received a very good education and studied law. He held minor positions under the French government and ran for a seat in the chamber of deputies in 1881. He was defeated, but gained his seat four years later. He has been a member ever since and has won a kingly appearance of his royal father. brilliant reputation for his oratory,

Photo by Bary, Paris. PAUL DESCHANEL.

logic and grasp of public questions. In 1899 his fellow members elected him president of the chamber, and he was recently re-elected. This dignity is considered the third highest in France."

Besides his political reputation M. Deschanel has won distinction in the world of letters. He has written a number of books on various subjects, all of which have been favorably received. In 1899 M. Deschanel was awarded the highest possible French distinction, membership in the "Forty Immortals," as the French academicians are known. In 1891 he was sent as a special envoy from France to the United States to study labor and sociological problems.

The fiancee of this brilliant young politician-author is Mlle. Price, daughter of a member of the chamber of deputies and granddaughter of the late Camille Doucet, formerly member and perpetual secretary of the French academy. All France rejoices that Paul Deschanel has at length consented to take a partner to share his many honors and dignities.

# AN APPLE QUEEN.

Mrs. Alderman Grows More Fruit

Than Any Man In South Dakota, Mrs. Laura A. Alderman of South Dakota is one of the great and growing class of American women who are proving that they can meet men on their own ground and beat them. Mrs. Alderman is the largest fruit dealer in

chard, which comprises 130 acres, and gets from it exceedingly large crops, tea, and if he remarks on her absence | Her last crop of apples measured 10,say it was my express desire. He has 000 bushels, and for her the read to fortune by means of the luscious Amerproper beast she is, nor what mischief | lean product seems clear. Mrs. Alder-

# HUNTING FOR REINDEER.

deutenant Bertholf Aiding in the Effort to Stock Alnaka.

Om Un æ Samuel engages in a good many different kinds of business of which the majority of his nephews and nieces know very little, but it may be doubted that any other of them presents so many queer features as the attempt to stock Alaska with reindeer. This attempt has been going on since 1893 and has met in the eyes of most people qualified to talk on the subject with decided success.

The man who is mainly responsible for this attempt to introduce a most

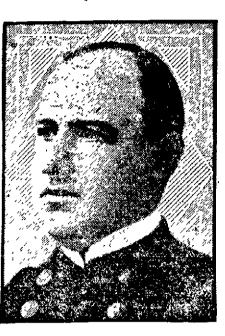

Photo by Taylor, Washington,

LIEUTENANT E P BERTHOLF.

useful animal in our arctic possessious is Dr. Sheldon Jackson. Dr. Jackson is one of the best known men in Alaska. He is a home missionary there and has been for many years. He was formerly moderator of the Presbyterian general assembly of the United States. His attention was first attracted to the usefulness of the reindeer as a burden bearer and as food while on a visit to Siberia in 1890, and since then be has been active and successful in getting the government to extend his work. The number of reindeer now in Alaska is estimated at several thousand.

Lieutenant E. P. Bertholf of the United States revenue cutter service, who has just been sent by the government to Siberia to inspect reindeer herds there with a view to purchasing them for transportation to Alaska, has had much experience in arctic waters. He is one of the three officers of the revenue cutter service who so bravely brought aid in 1898 to the 200 whalers who were reported to be starving at Point Barrow, the northernmost point of Alaska. Lieutenant Bertholf and his companions drove 500 reindeer over hundreds of miles of snow in the dead of winter. It was a splendid feat of daring and endurance.

# BOTH CROWN AND CROSS.

Queen Marie Henriette of Belgium Dying of a Broken Heart.

There are two little countries in northern Europe that are neighbors. and each of these countries has a queen. In the one the queen governs in her own right, and in the other she takes no part in the government and is only queen by marriage. In the first country, Holland, the gucen is supreme-

Photo by London Stereoscopic company. THE QUEEN OF THE BELGIANS.

ly happy, and in the other, Belgium. the queen is slowly but surely fading away because of a broken heart.

Belgium's queen has surely had enough of trouble to break down any woman, royal or commoner. Not the least of her sorrows is the profligacy of her husband. From one end of Europe to the other is the name of Leopold carried as that of a man who frequents from choice the lowest music halls of the continent. He is the worst of Europe's royal profligates, and no regard for the feelings of his wife hinders him in his evil courses.

Fate has hardly treated Marie Henriette in the matter of children. Her only son died in infancy, and her other three children are daughters. To of these contracted most unhappy marrlages, the eldest, Princess Louise, to Prince Philip of Saxe-Coburg-Gotha. Prince Philip's treatment drove her to an insane asylum. The second daughter, Princess Stephanie, married Crown Prince Rudolph of Austria, who committed suicide. She is now married again. The youngest daughter of Marie Henriette, Princess Clementine, is still unmarried.

# Omega Oil

Cold in the Chest-If a porous plaster was the only thing which cured cold in the chest or pains in the chest, there would be some excuse for putting one on, but there's something ten times better. It's Omega Oil. Rub your chest and throat with

> morning you'll be all right. Omega Oil is a liniment that does not burn, blister, or itch like a porous plaster. It doesn't stick to the skin like glue, either. Every mother knows that old-fash. ioned sweet oil is a real good remedy for rubbing on the chest when a cold has settled there, but sweet oil isn't near so good as Omega Oil. It contains a green Swiss herb that soothes, heals and subdues inflammation in a most astonishing way. It is good for everything a liniment ought to be good for. If your dealer refuses to supply you with this wonderful Swiss greenliniment, the Omega Chemical Co., 257 Broadway, New York, will mail you a bottle, prepaid, for 50c. in cash, money order or stamps. 755

# FROM FALLS ON ICE Health of the Inmates Good-Plans

Many Meet with Accidents and Injuries.

MRS. SUTER BADLY HURT

The Misfortune Comes as She is About institution next week. His successor to Offer Comfort and Sympathy-Policeman McGuire Disabled-Wil. lie Bantz Sustains a Broken Arm.

Mrs. Wilhelmina Suter, who resides with her daughter, Mrs. Manias Harrold, in South Henry street, sustained serious injuries at 6 o'clock Sunday evening. She slipped and fell on the icy walk as she was about to enter the residence of building. The walks and roads are Mrs. Hering, in West Tremont street, to inquire after the health of the latter, who has not been well for some time shape in which it will be left permapast. One of the bones of the right leg nently. was fractured near the hip. Mrs. Suter was removed to her home in Higerd's ambulance. Dr. Pumphrey was called.

SUSTAINED A BROKEN ARM. Willie Bantz, a boy residing at 525 South Erie street, carries his right arm in a sling, as the result of a fall on an ice-coated sidewalk, the other day. The child also sustained severe bruises.

POLICEMAN M'GUIRE HURT. Policeman McGuire, after a fall upon

the icy steps of the city prison Saturday evening, was removed to his home in a carriage. Surgeons found that no bones were broken, but bruises and the severe shaking-up have kept the officer at home ever since. He is somewhat better today and will report for duty this even-

Him a Big Vote.

Local Cigarmakers Give

ALSO GOMPERS AND WOOD.

The Massillon Voting Place was the Trades and Labor Assembly Hall-The Bartenders' Union Holds a Business Meeting, Followed by a Banquet-Other Union News.

The members of the International Cigarmakers' Union throughout the United States and Canada, Saturday afternoon, between 3 and 5 o'clock, voted for international officers, nominated several weeks ago. In Massillon the election was conducted at the Trades and Labor Assembly hall, the inspectors being George Franz, H. B. Sibila and Andrew Paul. The Australian ballot was used. The total vote in Massillon was twenty three. For international president G. W. Perkins received nineteen votes and J. Mahlon Barnes received three.

There were from two to four candidates for each of the seven vice presidencies. Those receiving a plurality or majority of votes cast in this city were the following: First vice president, Samuel Gompers; second, James Wood; third, A. Gariepy; fourth, T. F. Tracey; fifth, Jacob Nicodemus; sixth. Charles Specht; seventh, Conrad Abrams. For treasurer, Gibson Weber received 16. The other seven were divided among the remaining four candidates. It will be several weeks until the result of the election is announced from international headquarters at Chicago.

BANQUET OF THE BARTENDERS.

The local branch of the bartenders' union, at the Trades and Labor Assembly hall, Sunday afternoon, initiated six candidates for membership. Afterwards a banquet took place, at which brief addresses were made by various members. The expected debate on the question of Mrs. Nation's visit to Massillon did not take place.

THEY SYMPATHIZE.

Massillon tailors sympathize with Snyder, 12 E. Main street. their brethren of Akron, who are striking for a condition which now prevails in Massillon. The strike is to obtain a responding to that for which it is sold. Cure."—Harry Abbott, Cincinnati, O.

# PERSONALS.

Mrs. E. P. Green, has recovered from an attack of the grip at Canaseraga, N. Y., by the use Dr. Miles' Pain Pills.

Among the victims of the grip epidemic now so prevalent, F. Coyle is now recovering at Canton, O., by the use of Dr. Miles' Nervine and Pills,

W. E. Nihells, of St. Louis, Mo., who was down with grip, is reported much improved. He has used Dr. Miles' Nervine and Pills.

The friends of Mrs. L. Denison will be pleased to learn of her recovery from grip, at her home in Bay City, Mich., through the use of Miles' Nervine and

Everybody says that J. W. Udy is looking splendid since his recovery from the grip at his home in Des Moines, Iowa.

They all know that Dr. Miles' Nervine was what cured him. Prosecuting Attorney Charles L. De-Waele, who has passed the three-score mile stone, had a time with the grip; but when seen at his home in Roscommon,

Mich., the other day, he said Dr. Miles Nervine was what cured him. At nearly three-score and ten, Mrs. Galen Humphrey was fighting against odds when the grip attacked her; but she took Dr. Miles' Nervine, and now her neighbors in Wareham, Mass., re-

mark on how well she is looking, After an illness of five weeks from the grip, Mrs. Harriett Jackson is again about and looking fine. She began tak

STATE HOSPITAL NOTES.

for Spring Work. The past week has been very quiet around the state hospital. A number of

the attendants are afflicted with the prevalent disease, grip, but the patients are comparatively free from the malady. In fact the health of the patients is unusually good considering the weather and the season of the year.

Thomas Plant, assistant engineer, has resigned his position, and will leave the to Enter the Home of an Ill Friend has not yet been appointed. A number of applications are on file and a choice will be made within a few days.

The landscape gardener will return to the institution in a short time and will map out the work to be done in the spring. There will be a great deal of work done on the grounds during the coming summer. A large amount of this will be put on the portion of the practically graded there, and the ground can now be leveled up and put in the

Mrs. Jones Viciously Resists Arrest.

LOADED INTO A BARROW

The Intoxicated Woman Could Not be Easily Handled by Two Officers -Finally Gotten to Jail in a Sleigh - Quarrels of Neighbors-Other Police Court Notes

Mrs. Ella Jones, "the belle of Patagonia," arrested at a Clay street house where she was raising a disturbance at 6 o'clock Saturday evening, positively refused to walk when Patrolmen Wissmar and Budd offered to escort her to the city prison. The officers procured a wheelbarrow, intending to haul the woman to the jail, but she fought so viciously that she could not be kept in the vehicle. So a horse and sleigh were engaged at Keller's livery stable, near by, and she was at last taken to the bastile. Mrs. Jones admitted Monday morning that she had never been so intoxicated before in all her life, and the mayor thereupon fined her \$5 and the costs.

The officers say they never felt the need of a patrol wagon half so much before. Mrs. Jones, when she was gotten to the sidewalk, threw herself upon the ice-covered flagstones. Her struggles when the officers would attempt to raise her to her feet would cause the patrolmen to slip and fall, also. All members of the party were considerably bruised by the time Mrs. Jones was placed in a cell.

NEIGHBORS QUARREL. Mrs. Gilleski lives in North Mill street Mrs. Ahman is ber tenant. Neither can speak much English. Often they quarrel. Sometimes they fight. It was an indulgence of the latter nature which brought them before the mayor Saturday evening Mrs. Gilleski managed to make the mayor understand that her tenant would sooner fight than pay rent. Mrs. Ahman was successful in conveying the idea that her husband's salary was but \$7.02 a week, and that she could not pay a fine. His honor ordered Mrs. Ahman to vacate the Gilleski property, and directed that Mrs. Gilleski should not do anything to arouse the former while she was so doing. Then they

were discharged. ONE PLAIN DRUNK. The one plain drunk of Saturday right paid his fine and went his way.

Reports show a greatly increased death rate from throat and lung troubles, due to the prevalence of croup, pneumonia and grip. We advise the use of One Minute Cough Cure in all of these difficulties. It is the only harmless remedy that gives immediate results. Children like it. Chas. W. Cupples, 139 W. Tremont street; Rider &

# HAWAIIAN SCHOOLS.

OUR NEW TERRITORY IS MAKING GREAT MATERIAL PROGRESS.

Compulsory Education a Part of the Governmental System-Illiteracy is Uncommon in the Islands-New Hawalian College President.

Now that the Hawailan Islands have come under the wing of the American eagle and are fully organized as a territory of the United States it is interesting to note whether these faraway citizens of our country are being fitted to exercise the duties and have all the rights and privileges of other Americans. It is gratifying to learn that the percentage of illiteracy in the Islands is very much smaller than in many of the older countries which have had the benefits of centuries of civilization. A visitor to the islands is impressed by the ample provisions ground south of the present hospital for schools not only in Honolulu and the larger towns, but throughout the islands.

The language of the Hawaiian Islands is for the most part English, and instruction is given in that tongue. The native speech is receding slowly, but surely, just as the native population is dying away. At the time of the discovery of the islands by Captain Cook in 1778 the native population was

From a recent photo.

ARTHUR MAXSON SMITH. about 200,000. This has steadily de-

creased, so that at the latest census they numbered only about 31,000. Their religion is also dying; nearly all the natives are Christians.

Education in the Hawaiian Islands is compulsory, and the territorial government maintains a special school police to see that the laws are obeyed. All children of school age must attend some kind of school either public or private. There are more public than private schools.

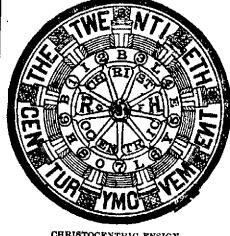

In the country districts of the Hawaiian Islands elementary instruction seems to be sufficient for the needs and wants of the natives, but in the towns secondary instruction of an excellent character is provided. Among the best educational institutions of the 50c islands is Oahu college, founded by the American mission. It was the first English school of the north Pacific and was established June 15, 1841, when for the most part the islands were still under heathen influence. It has grown wonderfully, its graduates being numbered by hundreds. From Oahu college have been graduated many of the children and grandchildren of the early American missionaries to the islands to whom Hawaii owes most of

its present civilization and prosperity. Oahu college is situated in the midst of wide grounds in the suburbs of Honolulu. As in almost every other place in "the paradise of the Pacific," flowers abound and render the site of the college a veritable bower of beauty. It has sent out some distinguished alumni, among them being General Samuel C. Armstrong, the founder and principal of the Hampton institute of Virginia, and the Rev. Mr. Gulick, who was the first to found high schools for girls in northern Spain.

The new president of Oahu college, Arthur Maxson Smith, is a very young man for the position. He is fresh from college halls. Mr. Smith won his degree of Ph. D. at the University of Chicago in August, 1900, and was immediately recommended for the headship of Oahu college by President Harper of the university.

By Christocentric Saved.

Following the example of more pretentious religious bodies Christocentries, of which the Rev. Edward Mc-Clain of Philadelphia is the head and

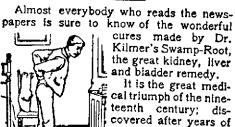

CHRISTOCENTRIC ENSIGN.

founder, is having a revival. Mr. Mc-Clain calls his movement the spreading of the lines of Christocentrics and exdesign is that of a wheel with concentric circles with Jesus as the hub. The circles are called respectively the church, Y. M. C. A., community, town, great city, state, and lastly the great

# DO YOU GET UP

WITH A LAME BACK?

Kidney Trouble Makes You Miserable.

It is the great mediteenth century; discovered after years of scientific research by Dr. Kilmer, the eminent kidney and blad-

der specialist, and is wonderfully successful in promptly curing lame back, kidney, bladder, uric acid troubles and Bright's Disease, which is the worst form of kidney trouble.

Dr. Kilmer's Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble it will be found just the remedy you need. It has been tested in so many ways, in hospital work, in private practice, among the helpless too poor to pur-chase relief and has proved so successful in every case that a special arrangement has been made by which all readers of this paper who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and

send your address to Dr. Kilmer & Co., Bing hamton, N. Y. The regular fifty cent and Home of Swamp-Root. dollar sizes are sold by all good druggists.

# TESLA'S PREDICTIONS.

What the Electric Wizard Sees in the Horoscope of Science,

In the current number of Success Nikola Tesla dips into the future as to what science has in store for mankind. Some of his predictions are as follows: A system of wireless telegraphy by which a message can be sent clear

around the world.

Electrical production of ozone for sterilizing water, to rid it of its many

The manufacture of artificial food by oxidized hydrogen.

The flying machine will be a fact. It will not bring universal peace, as some suppose. Some nation will rule the nir as well as the sea.

Future developments will tend to di-

minish the number of individuals engaged in battle. This will bring into use a machine which can be operated by the fewest possible individuals. Perfection of the telautomaton, a ma-

chine having all its bodily movements controlled from a distance, without wires. Telautomatics are applicable to any machine that moves on the land, in water or in the air. The transmission of electrical energy

through the ear h without a wire. A system to draw energy from the

The electrolytic process of extracting from from ore and molding it into required forms without fuel consumption. The electrolytic manufacture of aluminium and its gradual extermination

of copper and possibly iron. A self acting engine capable of deriving energy from its own motion.

# NEGROES LEAVE THE SOUTH Inducements Offered Them by Ha-

walian Planters.

The recent passage through New Orleans of a band of negro colonists bound for the sugar plantations of the Hawaiian Islands brings to light the fact that in the states of Mississippi. Kentucky, Louisiana, Tennessee, Arkausas and Texas agents for the Hawalian Sugar Planters' association are encouraging emigration, the extent of which bids fair, says the New York Post, to remove from the cotion and cane and tobacco fields of the south a considerable part of its most efficient

Headquarters for the project have been established in the little town of Hazlehurst, Miss., some 165 miles north of New Orleans and 50 miles south of Jackson. There resident agents are busy distributing literature of a simple 30th. kind and prospectuses to the field hands of the south. According to the agents, the sugar planters of Hawaii are badly in need of practiced labor for their fields. Hitherto the agents have found considerable difficulty in inducing the southern field hands to leave their cabins and certainty of existence even for the glittering promise held out to them in Hawaii. As a result the shipments so far have been small. In pursuance of an order of the Probate Nevertheless the agents have been able court of Stark County, Ohio, I will offer for sale, at public auction, on shipments so far have been small. to gather a collection of negroes. nearty all of them ranging in age from 16 to Already one consignment is working in the island sugar fields.

Mantchoos Dying Out.

In an account of Manchuria given in Petermann's Mittheilungen the statement is made that the Mantchoos are disappearing under the influx of the Chinese, and the time is probably not far distant when their language will cease to be spoken, as their children are taught Chinese.

Writing With Aluminium on Glass. In a patent for writing on glass the

glass is first moistened with strong vinegar, and the writing or other design is then made with an aluminium point. Infinitesimal particles of the soft metal are left adhering to the glass, and the writing is fairly permanent.

One Death; Ten Cases Plagus.

Cape Town, Feb. 11.-Ten cases of what is supposed to be bubonic plague have been isolated. One of the victims is a white person, the others being natives. A native child tas died of the disease.

## An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, Syrup of Figs, manufactured by the CALIFORNIA FIG SYRUP Co., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP Co. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

Brakeman Smiley was seriously injured. Three engines were wrecked and eight cars demolished.

## ALL GUESS WORK.

# Public His Plans.

CINCINNATI, Feb. 13.- [By Associated Press |—The Times Star has a telegram from Governor Nash saying that no newspaper has been authorized to say anything about his plans concerning the prize fight, and that all that has been printed is mere guess work. He says it would be injurious to the public service for him to talk about these matters.

# IS READY TO BUILD.

### A. E. Townsend's Statements Before Barbarton Council.

Barberron, Feb. 13.--A. E. Townsend, the promoter of the proposed electric street -railway between Barberton and Doylestown and thence on to Massillon, was before the council here Monday night and stated that he had ling. veturned from New York with plenty of financial backing and is ready to build the road. The council decided on the strength of what he said, to hold a special meeting Wednesday night when the matter of granting him a franchise to enter Barberton will be considered.

# NEW CHARRIER RILL

# ond Rending In the Senate.

the measure was reached in the senate Tuesday afternoon Mr. Filmn, of Allegheny, who is leading the opposition to it, said he would not oppose its pasage on second reading, as mediately move to have the bill recommitted to the committee on my ticket agent. nicipal affairs for the purpose of further amending it. Mr. Muchlbronner said such was the case, and after the bill had been read it was passed on second reading and recommitted.

There was considerable discussion of the bill providing for a new apportionment of the congressional districts when it came up for final passage. Mr. Grady, of Philadelphia, explained that he and his colleagues experienced much difficulty in framing a Federal Steel............. 53% measure which would meet the ob- Manastian. jections of everyone. He said that the bill as it stood was not perfect and that it was only the frame work of what it will finally be. He asked that all members vote for it, as he felt sure the measure would come from the house greatly altered and that it could then go to a conference committee for dressing up.

Senators Herbst, of Berks; Cochran, of Lycoming, and Heinle, of Cen-David Lehman is recovering from tre, opposed it, and advocated that the senate should perfect the bill be-Henry Lehman, of Oklahoma, is here for it goes to the house and not wait until it comes back greatly changed. Senator Flinn said he opposed the bill as at present drawn up, but was A teachers' institute will be held at willing to allow it to go to the house to get some suggestions from that

The bill was pased by a vote of 33

Mr. Vaughn, of Lackawauna, intro duced a resolution, which was adopted, requesting President McKinley to appoint Theodore J. Wint, of Scranton, lieutenant colonel of the Sixth U. S. cavalry, now in China, a brigadier general for conspicuous service in all wars during the past 40 years. J. Allen Leeds, of Philadelphia was re-elected reading clerk of the senate without opposition.

Among the bills introduced in the house were these:

Mr. Scott, of Philadelphia, one of the bills be introduced being this one: Punishing the crime of kidnaping with intent to extort money by
